

Paperwork, Performance and the FAA Ramp Check

How much fuel, weight and runway can you handle? The better question is how much can your airplane handle? Let's review the POH and discover what you have forgotten. When a FAA Inspector shows up at your plane, what are they looking for and what do you need to have with you to make your "ramp check" go smoothly?

Directions: From Hwy 167 go East on 15th Avenue NW one mile. Turn North on D Street NE. Follow the road and it becomes E St. NE. Turn left on 23rd Street NE.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
